

## UB-04 Data Files

The UB-04 Data File contains the complete set of NUBC codes. Every code in the range of possible codes is accounted for sequentially. There are no gaps because all used and unused codes are identified.

The file consists of an Excel workbook containing 14 worksheets sorted by data element (Form Locator (FL)):

- FL 04 - Type of Bill Facility Codes
- FL 04 - Type of Bill Frequency Codes
- FL 13 - Admission Hour
- FL 14 - Priority (Type) of Admission or Visit
- FL 15 - Point of Origin for Admission or Visit (includes Newborn and Non-newborn)
- FL 16 - Discharge Hour
- FL 17 - Patient Discharge Status
- FL 18-28 - Condition Codes
- FL 31-34 - Occurrence Codes and Dates
- FL 35-36 - Occurrence Span Codes and Dates
- FL 39-41 - Value Codes and Amounts
- FL 42 - Revenue Codes
- FL 66 - Diagnosis and Procedure Code Qualifier (ICD Version Indicator)
- FL 81 - Code-Code Field (for paper UB-04s only)

The code values are in Column "A" and code titles (the short descriptors) are in Column "C". The full definitions (long descriptors) as well as revenue code standard abbreviations are excluded.

A "1" in Column "B" indicates that the code is invalid for use as of 7/1/11; the majority of these are codes that are reserved for national assignment. Some of the codes labeled with a "1" have been approved, but become effective -- and therefore valid -- after 7/1/11.
